

Daytona Regional CHAMBER OF COMMERCE

ADVOCACY IN ACTION

2022 Legislative Priorities

COVID-19 Liability

The Daytona Regional Chamber of Commerce supports legislation that will protect our members, local business, their employers, and healthcare workers from COVID-19 liability.

Infrastructure, Transportation, and Utilities

The Daytona Regional Chamber of Commerce supports the funding of robust, safe, and modern transportation, infrastructure, and utility systems and the prioritization of forward-thinking investments of our systems to continue to have our state rank among the best in the nation.

Economic, Workforce, and Housing

The Daytona Regional Chamber of Commerce supports efforts to continue making Florida one of the most diverse economies in the nation by making our state the most business-friendly, attracting both domestic and international companies, supporting the continuing investment into Enterprise Florida and other economic development programs to attract high-skilled and high-wage jobs. The Daytona Regional Chamber of Commerce believes that in order to be a true economic leader across our nation, workforce housing needs to be looked at aggressively. We support the removal of unnecessarily burdensome zoning restrictions and streamlining of processes at all levels, preventing affordable workforce housing expansion.

Technology

The Daytona Regional Chamber of Commerce supports the expansion, investment, and development of technology targeting our most vulnerable community, including fully funding the states' broadband grant program targeting rural areas.

Tourism

The Daytona Regional Chamber of Commerce supports the total funding of Visit Florida, the extension of the agency's "sunset" date, and the flexibility to carry over unused funds.
